Post: IT Infrastructure Manager

Qualifications & Skills required

- Bachelor's degree in Information Technology, Computer Science, or related field; Master's degree preferred.
- Extensive experience (typically 3+ years) in IT infrastructure management, network administration, or related roles.
- Professional certifications such as ITIL, CompTIA Network+, Cisco, CCNA, or relevant vendor-specific certifications.
- Profound knowledge of networking, cloud technologies, security protocols, and system administration.
- Strong leadership, strategic planning, and problem-solving skills.

Job Description

1. Plan, design, and implement IT infrastructure strategies and solutions.

2. Manage and oversee network, hardware, software, and security systems.

3. Lead a team of IT professionals, providing guidance and support.

4. Ensure network efficiency, reliability, and security compliance.

5. Develop and manage IT budgets and resource allocation.

6. Collaborate with other departments for system integration and upgrades.

7. Implement disaster recovery and business continuity plans.

8. Evaluate new technologies and recommend upgrades or enhancements.

9. Ensure adherence to IT policies, procedures, and regulatory requirements.

10. Provide technical guidance, training, and support to the team.
